

National Oil Spill Detection and Response Agency (NOSDRA)

Call for Proposals

Background: The National Oil Spill Detection & Response Agency

(NOSDRA), the Federal Government parastatal vested with the responsibility of managing oil spill incidents with respect to recovery, clean-up, remediation of impact sites as well as damage assessment had initiated the process of developing the National Dispersant use Policy for Nigeria.

The key objective is to provide a standardised guideline, procedures and protocols for the production and application of dispersants in the Nigerian environment to achieve sustainability in the petroleum sector.

In view of the above, interested consultants/contractors are invited to submit technical and financial Proposals for the under-listed project:

Development of National Dispersant Use Policy for Nigeria

Terms of Reference (TOR)/Scope of Work

- i. to provide the general guidelines and procedures for the use of dispersants in Nigeria in line with global best practices;
- ii. to identify the criteria for approving the appropriate dispersant for use in different oil spill response scenarios;
- iii. to standardise the application of dispersants among operators in the upstream sector of the petroleum industry;
- iv. to provide the application methods and levels of concentration required to achieve effective environmental protection;
- v. to prescribe the quality control and assurance procedures for administration of dispersants in Nigeria and environment;
- vi. to determine the standards and guidelines for manufacturing and importing dispersants in Nigeria

Submission of proposals

Proposals should be sent using a two-envelope system (Technical and Financial Proposals separately) not later than 22nd May, 2012. The project title should be clearly written on the top left corner of both envelopes while the Consultant's/contractor's name on the reverse side of the envelope. Proposals should be addressed and submitted to

Office of the Director-General/CEO
