

Port Harcourt Refining Company Limited

A Subsidiary of Nigerian National Petroleum Corporation (NNPC)

Invitation to Bid:

**Phased Rehabilitation Programme for the Rehabilitation of Crude Oil Storage Tank
50TK01F – Pre-qualification of Prospective Contractors**

Introduction:

Port Harcourt Refining Company Limited is a subsidiary of the Nigerian National Petroleum Corporation (NNPC). The company comprises of two Process Plants:

- (1) A 60,000 BPSD Hydro Skimming Plant known as Old Port Harcourt Refinery (OPHR) and
- (2) 150,000 BPSD Refining Plant known as New Port Harcourt Refinery (NPHR)

Purpose of the Project:

The Nigerian National Petroleum Corporation (“NNPC”) wishes to carry out rehabilitation of a 60,000m³ (64m diameter x 21m height) crude oil storage tanks at Part Harcourt Refining Company Limited. The tank requires total rehabilitation due to defective parts as found during major inspection. The rehabilitation is to bring back the tank to a serviceable condition (within a reasonable frame of time) for the purpose of increasing the availability of storage facility for crude oil.

Proposals are therefore invited from reputable Companies, for the Rehabilitation of the tank.

Scope of Work:

This shall include but not limited to the following

- (1) Provision of 4184m² of 6mm thick carbon steel plate to replace the entire bottom plate excluding the annular ring;
- (2) Provision of 2092m² (5mm thick) carbon steel plate to replace the corroded portion of the roof centre deck;
- (3) Provision of 20m² (6mm thick) carbon steel plate to replace the corroded base plate of the rolling ladder rail system;

- (4) Provision a complete new fire resistant liquid- filled tube seal to replace the existing mechanical (Neoprene) seal;
- (5) Replacement of 2 Nos. mixers with complete new ones, inclusive of explosion proof local control stations (4 Nos. 2 per mixers);
- (6) Carrying out soil test of the tank foundation to determine extent of contamination/deterioration and replace the soil to the depth as per original construction;
- (7) Carrying out foundation survey to determine current settlement level;
- (8) Dismantling of all swivel and flange joints of the three drain line system of the tank. Cleaning and servicing of the components;
- (9) Assembling the component of the roof drain line and subject the lines individually to hydro test at 5kg/cm² for duration of one hour and effecting repairs if any;
- (10) Dismantling of all associated valves of the piping connections, servicing and re-installation;
- (11) Re-levelling the tank foundation to ensure no retention of water in the annular plate region;
- (12) Provision of materials and fabrication of hand rail round the wind girder plate;
- (13) Sand blasting and painting of entire shell and roof externals;
- (14) Sand blasting and painting of entire floor plate and first shell course internal;
- (15) Sand blasting and painting of Spiral stairways, safety hand rails, gaugeris platform, Cat walks, Wind guider, Rolling ladder and associated rail system;
- (16) Provision of Cathodic Protection of the bottom plate using impress current;
- (17) Execution of relevant NDTs (X-Ray, DPT, Vacuum Test etc.) on all repairs;

(18) Recalibrating the tank after completion of the tank rehabilitation;

(19) Any other job/activity as contained in the BOQ.
