

Total Upstream Nigeria Limited

Operator of the OML 130 Asset

RC 321517

Tender Opportunity for OML 130-Egina Field Development (EGI/C137) Maintenance & Inspection Integration Studies & Services

Introduction

Total Upstream Nigeria Limited (TUPNI), operator of the OML 130 requires the services of a suitably indigenous qualified and experienced company to provide requisite expertise, experienced, internationally skilled manpower and technology to apply to be considered for inclusion in the bidders list for subject tender. The contract that will result from this tender will be for the provision of the Maintenance and Inspection Integration Studies and Services for the upcoming Egina Deep Water Development Facilities.

2. Brief description of the work scope:

Successful contractor shall be required to provide the following objectives for the Maintenance and Inspection Integration Studies and Services (MISS), from an appropriate integration of Maintenance, Inspection and Engineering (MIE) studies, which are carried out over all EPC Contractors involved in the Egina Project. This to ensure Maintainability and Inspectability of the facilities, Spare parts handling and to ensure preparedness of operations through the issue of consolidated and consistent M&I Manuals defining human and material resources as well as adequate contracts and procedures needed to carry out such activities.

The **MISS** Scope of Works will cover:

- The assistance and coordination of interfaces for MIE studies, including communication channels and schedule, to ensure an effectiveness of MIE studies and their integration
- The assistance and coordination of the Maintenance and Inspection philosophies to be developed during the detailed Engineering phase by the selected Contractors for the supply of the main Equipments and the fabrication and installation of the Egina Infrastructure.
- The development and the issue of the final consolidated Maintenance and Inspection Manuals and Documentation, including all associated relevant Studies required to set up Maintenance and Inspection plan for operating the Egina field (specific studies, manuals and procedures, planning, data base, resources and organization including training, tools and spare parts, consumables,...).
- The assistance, coordination and verification of Maintainability and Inspectability studies, including identification of all Critical elements and associated reliability

- The verification and the consolidation of the information, documentation and studies issued by the various Contractors.
- The integration of Monitoring strategies defined and implementation for all components of the facilities
- The consolidation of all spare part requirements, along with tooling and consumables whether for their usage or procurement
- The preparation of the Technical documentation for the Maintenance and Inspection contracts in accordance with the Company contracting-out strategy
- Assisting Company with the procurement of essential Spare Parts and the administration.

The MISS shall cover all elements of the Egina facilities: FPSO SPS Subsea lines export Terminal and associated equipments.
