(1) INTRODUCTION

Nigerian Agip Exploration Limited (hereinafter referred to as "NAE"), operator of OML125 & 134, hereby invites reputable Chemical Company to apply to be considered for inclusion in the bid list for the proposed contract for the supply and monitoring of various treatment chemicals through the NipeX portal.

The work location is production facility in ABO deep offshore location of Nigeria. Company will require through this Contract an integrated service through a qualified Contractor that provides a quality chemical product and a proper service to ensure that the Company Key Performance Indicators (KPI) is achieved. It is foreseen that the contractor through this contract shall supply the chemicals required to treat our oil, gas and water streams/facilities. The chemical screening procedure will involve the performance of, daily chemical analysis, bottle testing/field trial (as the case may be) of each of the chemicals to be supplied.

Company's KPI that Contractor shall comply with through this contract include but not limited to the following::

No emulsion, No wax deposition, No scale deposition, No hydrate formation, H₂S level less than 10ppm, Percentage of oxygen concentration not less than 20 parts per billion, Efficient control of subsea production systems, Percentage increase of flow rates while maintaining existing pipeline/flowline pressure, SRB values below 100 cfu/m and max. corrosion rate of 0.1mm/yr.

The proposed contract term will be for a period of Two (2) years with option of One (1) year extension. Contract will be awarded at the end of the tender exercise to the Two (2) lowest responsive applicants.

(2) SCOPE OF WORK.

- The Scope of work shall include but not be limited to the following activities:

- Provide all the equipment, materials and personnel needed for the periodic optimization programs.
- During execution of work activities COMPANY policies, standards and specifications shall be abided to.
- Supply of chemicals on time and on call-off basis and according to Company's requirements
- Perform all necessary tests in order to ensure proper performance of chemicals
- When necessary optimization of chemical treatment, adjusting the dosages in line with production changes
- When necessary, continued optimization, improvement and implementation of the chemical program under the supervision of Company personnel
- Provide trained personnel to assist the Company's Laboratory in the measurement and analysis of the most common parameters related to the chemical treatment
- Submit the chemical reports as at when due and handling a comprehensive database for easy follow-up of chemical treatment
- Tracking of system changes in order to adjust program accordingly

(3) MANDATORY REQUIREMENTS

(a) To be eligible for this tender exercise, interested Contractors are required to be pre-qualified in the 2.07.09: Production/Process/Drilling Chemicals (Product/Services) in NipeX Joint Qualification System (NJQS) database.
